YOUR PREFERRED CMO – WHEREVER YOUR MARKET

With an in-country manufacturing site in Wuxi, China, Wuxi Griffin offers compliance to international GMP quality requirements for the global market. Wuxi Griffin provides Chinese established pharmaceutical companies to initially fill phase I to phase III pharmaceuticals, for the markets in China, USA and Europe, followed by commercial filling for market approved products. Similarly, Wuxi Griffin offers Western pharmaceutical companies integration of their products to the lucrative Chinese pharmaceutical market as well as to the markets in West.

Wuxi Griffin is your preferred CMO and we will help you with a smooth market launch of your products, whether it is in China, Europe or USA.

Benefits of partnering with Wuxi Griffin as a CMO in China:

- Contract manufacturing in China for the global market
- Compliance to international GMP quality standards
- Access to the international pharmaceutical market, especially China, Europe and USA
- Assistance from project development to a successful market launch of your products to your chosen markets

“We understand that choosing the right CMO is of great importance to your success. Wuxi Griffin is dedicated to ensure you feel confident in your choice of a strategic partner”

We help you with a smooth introduction of your products to the global market, whether in China, Europe or USA

WHO WE ARE

Wuxi Griffin is a joint venture between Wuxi Fortune Pharmaceutical Co LTD in China and SialoCarb AB in Sweden. We serve as an international CMO in fill and finish of sterile injectables. Our management's extensive experience in the pharmaceutical industry average 15 years and we are experts in what we do.

With our devoted team of professionals, we are here to provide you with customized production solutions throughout the project lifecycle. Our dedication will continue throughout the project to ensure we meet your requirements. At the heart of our work is our customers' success and we strive to deliver timely results of highest quality.

Wuxi Griffin has the experience, technology and professionalism needed for collaborations within the pharmaceutical business

TECHNICAL DETAILS

In our 2550m² / 27450 sqft GMP compliant fill & finish facility, Wuxi Griffin offers state-of-the-art RABS and Isolator filling technology with great flexibility to meet your needs. Our production technology is supported by modern utility systems.

Vial Filling

- Isolator-based aseptic vial filling line for aqueous solution products
 - Glass and polymeric vials (0.5ml – 30ml; 13mm and 20mm stoppers)
 - 1200 – 1500 units per hour based on the smallest vial size of 2R
 - 200 – 10000 units per batch in automated filling
 - Flexibility in batch sizes including small batch clinical trial materials
 - On-going expansion of large-scale vial filling

Ampoule Filling

- RABS-based ampoule filling line for aqueous solution products with terminal sterilization of filled products (superheated water autoclave)
 - Glass ampoules (2ml – 20ml)
 - Up to 18000 units per hour for the smallest ampoule size of 2ml
 - Flexibility in batch sizes

Formulation	Container System	Fill Volume	Capacity
Sterile Liquid Solution	Vials, Stoppers and Crimps (Aseptic processing and terminal sterilization)	0.5ml to 30ml	120 units up to 1200* units per hour
	Ampoules (Terminal sterilization)	2ml to 20ml	18000* units per hour

**Based on smallest vial/ampoule size*

Formulation Vial Filling

- 1 formulation manual single use system 1 – 10L
- 1 formulation single use mixing system 10 – 30L
- 1 formulation single use mixing system 20 – 50L
- 1 formulation single use mixing system 50 – 200L
- Planned formulation vial filling line system 500L

Formulation Ampoule Filling

- 2 formulation stainless steel tanks with total capacity of 50L and 150L with automatic CIP/SIP system
